# ANSHUL PATIDAR

**AI/ML Engineer | Agentic AI Developer**

+91 7581056327 anshulptdr94@gmail.com Indore, Madhya Pradesh **Portfolio** **LinkedIn** **GitHub**

## SUMMARY

AI/ML Engineer with hands-on experience in Machine Learning, LLMs, RAG, and Agentic AI systems. Skilled in building AI agents, intelligent career platforms, voice-enabled AI assistants, and predictive ML solutions. Proficient in Python, LangChain, Flask, and end-to-end AI application development. Passionate about building scalable, real-world AI products.

## EXPERIENCE

### AI/ML Intern — Dollop Infotech Pvt. Ltd. **6 Months**

- Developed and maintained backend features using Python and Flask to support AI-driven application workflows.
- Worked with LangChain and RAG pipelines to integrate LLM-based capabilities into internal AI features.
- Integrated the Tavily Search API to enable real-time web search functionality within AI features.
- Used SQLite for data storage and management in AI application modules.
- Assisted in debugging, testing, and refining AI features in collaboration with the development team.
- Collaborated with team members on feature development, code reviews, and issue resolution.

## PROJECTS

### CareerPilot AI — Agentic AI Career Intelligence Platform **Live Demo**

- Developed an agentic AI platform for resume analysis, career guidance, and job recommendations.
- Built AI Resume Analyzer, Career Assessment, Resume Builder, and AI Job Finder using LLMs, LangChain, and RAG.
- Integrated Tavily Search API for real-time web search and intelligent job discovery.

**Tech Stack:** Python, Flask, SQLite, HTML, CSS, JavaScript, LangChain, Ollama/Groq, Tavily API, RAG.

### AI Learning Assistant (RAG + Voice)

- Built an AI-powered voice-enabled RAG chatbot for students to upload notes/PDFs and ask questions.
- Implemented Whisper (STT), edge-tts (TTS), and LangChain for natural voice-based conversations.
- Used FAISS and HuggingFace Embeddings for semantic search and context-aware responses.

**Tech Stack:** Python, LangChain, FAISS, Whisper, edge-tts, Ollama/OpenAI, RAG.

### Food Delivery Time Prediction (Machine Learning)

- Developed an end-to-end ML regression model to predict food delivery time using Random Forest Regressor.
- Processed 45,000+ real-world delivery records using data cleaning, missing value imputation, and feature engineering.
- Built an automated preprocessing pipeline using ColumnTransformer, SimpleImputer, OneHotEncoder, and OrdinalEncoder.
- Achieved best performance with Random Forest ($R^2$ = 0.834, MAE = 3.08 min, RMSE = 3.82 min).
- Saved the trained Random Forest model using Joblib for efficient prediction and deployment.

**Tech Stack:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Joblib.

## EDUCATION

### Christian Eminent College, Indore (DAVV University) **2024 – 2027**

BCA (Bachelor of Computer Applications)

## SKILLS

**Programming:** Python, SQL
**Frameworks:** Flask
**Machine Learning:** Scikit-learn, Regression, Classification, Feature Engineering, Data Preprocessing, Model Evaluation
**Databases:** SQLite
**AI / LLM:** LLMs, LangChain, RAG, AI Agents, Prompt Engineering, FAISS, Embeddings
**Data Analysis:** Pandas, NumPy, Exploratory Data Analysis (EDA)
**Web Technologies:** HTML, CSS, JavaScript
**APIs & Tools:** Tavily API, Git, GitHub, Jupyter Notebook, VS Code, Ollama, Groq
