

ANSHUL PATIDAR

AI/ML Engineer | Data Science & Generative AI

Indore, Madhya Pradesh | +91 7581056327 | anshulptdr94@gmail.com

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Aspiring AI/ML Engineer with hands-on experience across Machine Learning, Data Analysis, NLP, and Generative AI. Proficient in Python, Scikit-learn, Pandas, and SQL, with a track record of building and evaluating predictive models on real-world datasets (10,000+ records, up to 90% prediction accuracy). Delivered projects spanning recommendation systems, RAG-based chatbots with FAISS, and regression modeling. Quick learner, immediate joiner, and eager to apply AI/ML skills to solve real business problems in a fast-paced team.

SKILLS

- Programming & Querying: Python, SQL
- Machine Learning: Regression, Classification, Feature Engineering, Model Training & Evaluation, Scikit-learn
- Deep Learning: TensorFlow, Keras, Neural Networks, Convolutional Neural Networks (CNNs)
- Generative AI & NLP: RAG, Text Embeddings, Semantic Search, FAISS, Prompt Engineering
- Data Analysis: Pandas, NumPy, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA)
- Data Visualization: Matplotlib, Seaborn
- Tools: Git, GitHub, Jupyter Notebook, VS Code

PROJECTS

Swiggy Delivery Time Prediction — Machine Learning | *Python, Pandas, NumPy, Scikit-learn*

- Built Random Forest and Linear Regression models to predict food delivery time on 10,000+ real-world records.
- Performed data cleaning, missing-value handling, and feature engineering; conducted EDA to identify key factors (distance, traffic, weather).
- Improved prediction accuracy to 90% and reduced error (MAE) through hyperparameter tuning.

AI Website Chatbot — RAG System | *Python, NLP, Embeddings, FAISS*

- Developed an NLP-based chatbot using text embeddings and semantic search for accurate information retrieval.
- Indexed textual data and applied vector similarity techniques (FAISS) for fast, relevant response generation.

AI Agent Mobile Finder — Recommendation System | *Python, Pandas, APIs*

- Built a recommendation engine to suggest smartphones based on user preferences (budget, brand, specs).
- Designed filtering and ranking logic and processed structured product datasets to support decision-making.

EDUCATION

Christian Eminent College, Indore (DAVV University)

BCA (Bachelor of Computer Applications) | 2024 – 2027

Placement Adda

Data Science & Machine Learning Training | 2025 – Present
